SKILLS

- Python programming
- Machine learning
- Data cleaning
- Generative AI
- Data visualisation
- Web application development
- Software engineering
- AI Productivity tools
- Prompt Engineering
- Analytical Thinking
- Team Collaboration

LANGUAGES

First Language: Hindi

B2

Upper Intermediate

CERTIFICATIONS

- Core and Advance Java Development
- AI Tools Workshop
- BCG- Gen AI Job Simulation
- Bharat XR Augmented Reality Workshop

ACCOMPLISHMENTS AND AWARDS

- **First Place / Winner – TechInertia, 2025**
President | Robotics Club, Greater Noida College (*August 2020–Present*)
- **Led a team of students to design and program autonomous robots for regional competitions.**
- **Coordinates weekly workshops on Arduino, ROS, and CAD modeling**

Enthusiastic BTech CSE AIML student with a solid foundation in Python, machine learning, data visualisation, and full stack development. Experienced in AI, IoT, SQL, and generative AI, contributing to real projects through analytical thinking and teamwork. Offers strong communication and customer focus while actively developing industry-ready skills.

EXPERIENCE

June 2026 - August 2026

Data Science Intern *Yatra Online*, Gurugram, India

- Developed full-stack AI-Powered RAG Chatbot for intelligent document Q&A, integrating PDF upload, semantic embeddings, ChromaDB vector store, hybrid retrieval, and Google Gemini responses with page-level citations, alongside JWT authentication, MongoDB chat history, and responsive web UI.
- Utilised SQL for database management to enable efficient data retrieval for analysis across multiple projects.
- Implemented data cleansing and preprocessing techniques to improve data quality for analysis projects.
- Engaged in continuous learning to stay abreast of emerging data science techniques and technologies, applying new knowledge to projects.
- Demonstrated outstanding technical skill, including comprehensive working knowledge of SSJS, SSRS, SQL, Python and Azure Data Factory.

January 2026 - March 2026

Intern *Eduskills Foundation*, India

- A 10-week AI and IoT internship supported by AICTE, focusing on microcontrollers, sensor integration, and machine learning for robotic perception. Developed hands-on expertise in robot kinematics, actuators, and IoT data processing to build intelligent, automated systems. Achieved an “Outstanding” (Grade-O) rating for technical proficiency in simulation and troubleshooting.
- Actively listened to customers to fully understand requests and address concerns.
- Shadowed daily activities of office staff to gain understanding of scope of work.
- Maintained organised and updated file systems for easy staff use.
- Contributed to project management tasks, tracking progress and coordinating with team members for timely completion.

EDUCATION

2028

Bachelor of Science B.tech CSE AIML

Greater Noida College, Greater Noida, UP

Expected in May 2028

B.Tech | Computer Science & Technology (AI & ML)

Currently in 5th Semester

Affiliated to Dr. A.P.J. Abdul Kalam Technical University (AKTU)

PROJECTS

AI-Powered RAG Chatbot

Full-stack Retrieval-Augmented Generation chatbot built during my internship at Yatra. PDF upload, Sentence Transformers embeddings, ChromaDB, hybrid retrieval, Google Gemini answers with page-level citations. JWT auth, MongoDB chat history, multi-session memory.

SmartCampus Management System

Java console app for college final assessment. Students, courses, enrollments with custom exceptions, multithreading, file persistence, and OOP design.

CampusLinkAI

College dating app MVP — lightweight web prototype for campus social connections with clean UI and interactive flows.
